instant new york times bestseller winner of the nautilus gold award a powerful and provocative testament to the diverse coalition of minds we ll need to face the mounting challenges of the twenty first century steve silberman an absolute eye opener frans de waal a landmark book that reveals celebrates and advocates for the special minds and contributions of visual thinkers a quarter of a century after her memoir thinking in pictures forever changed how the world understood autism temple grandin an anthropologist on mars as oliver sacks dubbed her transforms our awareness of the different ways our brains are wired do you have a keen sense of direction a love of puzzles the ability to assemble furniture without crying you are likely a visual thinker with her genius for demystifying science grandin draws on cutting edge research to take us inside visual thinking visual thinkers constitute a far greater proportion of the population than previously believed she reveals and a more varied one from the photo realistic object visualizers like grandin herself with their intuitive knack for design and problem solving to the abstract mathematically inclined visual spatial thinkers who excel in pattern recognition and systemic thinking she also makes us understand how a world increasingly geared to the verbal tends to sideline visual thinkers screening them out at school and passing over them in the workplace rather than continuing to waste their singular gifts driving a collective loss in productivity and innovation grandin proposes new approaches to educating parenting employing and collaborating with visual thinkers in a highly competitive world this important book helps us see we need every mind on board

this volume offers comprehensive treatment of the latest developments in critical systems thinking and practice the book features contributions by researchers at the prestigious centre for systems studies at the university of hull england the emphasis is on rigorous analysis of the wide range of approaches to problem solving reported in the research literature this work will enhance the studies of researchers and students in the areas of systems problem solving action research management science and operational research

what does it mean to think with images there is a well established tradition of studying thought processes through the nature of language and we know much more about thinking with language than about thinking with images piotr kozak takes an important step towards rectifying this position presenting a unified theory of different types of images such as diagrams maps technical drawings and photographs kozak argues that images provide a genuine and autonomous form of content and

knowledge in contrast to the propositional view of thinking and resemblance based accounts he puts forward a measurement theoretic account of images as operations that exemplify measures revealing the outcomes of measurement operations performed on a depicted situation bringing together insights from philosophy of science picture theory cognitive science and cognitive psychology this book demonstrates that we can only understand what an image is if we truly understand the role they play in our thought processes challenging the prevailing view that the utility of images is only instrumental and cognitively inferior

list of members in each volume

a collection of essays discussing the philosophical perspectives of thinking and education this book considers such subjects as the development of education the role of micro computers in science education and theories of education

includes section reviews and notices of books
